Q2 Key Topics

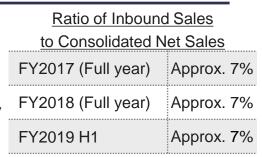

Cosmetics Market

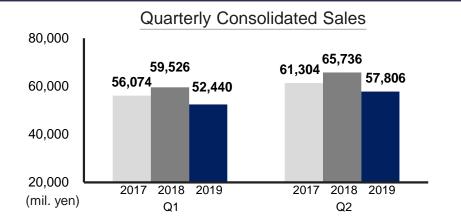

- The Japanese cosmetics market including exports showed steady growth.
- As for inbound demand, the number of visitors to Japan continued to increase. However, the growth rate of demand has been slowing down, presumably being affected by yen appreciation, in addition to the effect of the e-commerce law in China.
- Excluding inbound demand, it is assumed that the size of the Japanese domestic market is shrinking.

Our Group

*Source: Ministry of Economy, Trade and Industry, Ministry of Internal Affairs and Communications, Japan Tourism Agency, Japan Department Stores Association, and Intage SLI

- Consolidated sales and operating income decreased owing to POLA, even when the effect of the transfer of the pharmaceuticals business is excluded.
- At POLA, domestic sales of health foods continued to decrease; overseas business continued to be strong especially in China and duty free.
- Although sales declined at ORBIS, the brand saw favorable sales of mainstay products such as *ORBIS U* and realized customer structure improvement.
- Jurlique has undertaken measures for cost structural reforms.
- For Brands under development, THREE enjoyed contributions from overseas sales and new brands opened stores steadily.
