1. Qualitative Information on Consolidated Performance for the First Half of Fiscal 2016

(1) Explanation of Consolidated Operating Results

During the first half of fiscal 2016 (January 1 – June 30, 2016), the Japanese economy continued on a moderate recovery track backed by improvement in the employment situation and corporate earnings, and this trend is expected to continue in the future. However, there are concerns about the impact of overseas economies and fluctuations in financial capital markets.

The domestic cosmetics market grew steadily, mainly in skincare products, despite signs of weakening growth in inbound consumption by tourists visiting Japan. However, the market scale remained the same as the previous year when inbound consumption is excluded. In the overseas cosmetics market, a modest expansion continued, despite a slowdown in economic growth in China and other emerging countries in Asia.

Within this market environment, the POLA ORBIS Group (the “Group”) continued its efforts to achieve enhanced corporate value by further strengthening the domestic earnings structure, accelerating overseas expansion, and improving capital efficiency during the current fiscal year, which marks the final year of the three-year medium-term management plan (from 2014 to 2016).

As a result of these factors, the Group achieved the following consolidated operating results for the first half of fiscal 2016.

Consolidated net sales for the first half of fiscal 2016 grew 7.2% year on year, to ¥106,957 million, reflecting the strong performance of the brands under development—THREE and decencia, in addition to the flagship brand POLA. Operating income rose 31.5% year on year, to ¥12,150 million, resulting from higher gross profit accompanying the increase in sales. Ordinary income advanced 16.4% year on year, to ¥11,258 million. In addition to the above results, profit attributable to owners of parent grew 35.7% year on year, to ¥8,264 million, due to an increase in income taxes, despite the recording of extraordinary income in association with the transfer of noncurrent assets.

Note: Reconciliations of segment profit refer to elimination of profits arising from inter-company transactions and expenses not allocated to reportable segments. Please see note 2 in “1. Information about Net Sales and Profit (Loss) by Reportable Segment” on page 11 and 12 for the details of reconciliations of segment income during the period.

Beauty Care

The Beauty Care segment consists of the flagship brands ***POLA*** and ***ORBIS***; the overseas brands ***Jurlique*** and ***H2O PLUS***, and the brands under development—***pdc***, ***FUTURE LABO***, ***decencia***, ***ORLANE***, and ***THREE***.

POLA is seeking to achieve long-term stable growth through revamped branding and educational investment and change of the sales commission system for development of professional Beauty Directors. Business in the domestic market performed favorably thanks to a steady increase in customers due to proactive launches of new products and sales promotions, including the launch in March of the daytime cream ***B.A Protector***, and a full update of esthetic services in April, in addition to expansion of inbound sales from tourists visiting Japan in health and beauty foods and cosmetics. In overseas markets, results have been challenging overall with the exception of the Hong Kong market. As a result of these factors, POLA recorded net sales exceeding those of the corresponding period of the previous year.

ORBIS is making efforts to reinforce brand communication, acquire customers by means of social media, and improve second-time purchase rates with the aim of achieving further growth and improved profitability through brand evolution. In the domestic market, the number of customers grew due to the launch in March of ***ORBIS=U WHITE*** series for skin-whitening and anti-aging care, in addition to enhancements to the point system and communications using social media. Operating income, however, fell below that of the corresponding period of the previous year owing to the decrease of the efficiency for points expenses. China and Singapore saw favorable sales growth, with results exceeding those of the corresponding period of the previous year. As a result of these factors, net sales of the ORBIS brand exceeded those of the corresponding period of the previous year.

For overseas brands, the Group is endeavoring to maintain a high rate of growth and achieve the contribution to revenues and earnings, focusing on Asia as a growth driver. ***Jurlique*** showed a performance on par with that of the previous year in the Australian market but continued to face severe conditions in the Hong Kong markets. Additionally, influenced by the change from retail sales to distributor sales since March in the Chinese markets, net sales fell below those of the corresponding period of the previous year. Although ***H2O PLUS*** carried out brand restaging to restore growth, net sales fell below those of the corresponding period of the previous year due to the impact of declining sales resulting from the closure of underperforming stores in China. As a result, net sales of overseas brands fell below those of the corresponding period of the previous year.

Brands under development recorded net sales exceeding those of the corresponding period of the previous year, due to the strong performance of ***THREE*** and ***decencia***.

As a result of the factors noted above, net sales—sales to external customers—were ¥99,343 million, up 6.7% year on year, and operating income was ¥12,080 million, up 39.2% year on year.

Real Estate

The Real Estate segment concentrates on the leasing of office buildings in urban areas. Efforts are currently directed at sustaining rent levels but leaning more toward raising rents and occupancy rates by creating attractive office environments. Another area of emphasis is the residential properties rental business. This business highlights condominiums perfect for families with young children. During the first half of fiscal 2016, net sales exceeded those of the corresponding period of the previous year due to rises in tenant occupancy rates and unit prices per tsubo (equivalent to approximately 3.3 square meters), as a result of revising occupancy conditions in light of the situation in the market and at other companies as well as carrying out measures to improve the value of buildings.

As a result of the above, net sales—sales to external customers—generated by the Real Estate segment totaled ¥1,517 million, up 4.5% year on year, and operating income was ¥797 million, up 33.5% year on year.

Others

The Others segment comprises the pharmaceuticals and building maintenance businesses.

The pharmaceuticals business draws on results accumulated by Group companies in research related to cosmetics and quasi-pharmaceuticals to develop, manufacture and sell new pharmaceuticals and conduct contract manufacturing of pharmaceuticals. During the first half of fiscal 2016, net sales were up year on year as a result of the Group's continued sales activities specializing in the priority field of dermatology, in addition to sales of ***Duac® Gel***, a combination drug for the treatment of acne vulgaris, under a license agreement with the GlaxoSmithKline Group, and the launch in April of ***LUCONAC® Solution 5%***, a treatment for onychomycosis. Meanwhile, operating income declined year on year, due to the additional costs incurred for initial promotion of the two new drugs.

The building maintenance business is engaged in the operation and management of buildings mainly catering to the needs of Group companies. During the first half of fiscal 2016, the Group saw growth in orders received thanks to ongoing sales activities, and net sales exceeded those of the corresponding period of the previous year.

As a result of the above, net sales—sales to external customers—generated by the Others segment totaled ¥6,096 million, up 17.3% year on year, and operating loss amounted to ¥335 million (¥72 million in operating income for the corresponding period of the previous year).

(2) Explanation of Consolidated Financial Position

As of June 30, 2016, total assets stood at ¥223,667 million, down 5.1%, or ¥12,067 million, from December 31, 2015. Factors related to this change included decreases of ¥5,741 million in cash and deposits, ¥2,731 million in notes and accounts receivable – trade, ¥797 million in land due to the sale of idle property, ¥1,835 million in goodwill and ¥1,120 million in right of trademark due to exchange rate movements .

Total liabilities amounted to ¥43,245 million, down 21.5%, or ¥11,853 million, from December 31, 2015. Factors related to this change included decreases of ¥2,399 million in income taxes payable and ¥8,220 million in "Other" of current liabilities due to a decrease in sales commission payable.

Net assets amounted to ¥180,421 million, down 0.1%, or ¥213 million, from December 31, 2015. Factors contributing to this change included a decrease of ¥3,845 million in foreign currency translation adjustments due to exchange rate movements and ¥4,423 million in dividends from retained earnings, partially offset by profit attributable to owners of parent of ¥8,264 million.

(3) Explanation of Consolidated Performance Forecast and Other Predictive Information

2. Summary Information (Notes)

(1) Changes in Significant Subsidiaries during the Current Period

None

(2) Changes in Accounting Policies, Accounting Estimates, and Restatement

(Changes in Accounting Policies)

Effective from the first quarter of fiscal 2016, the Accounting Standard for Business Combinations (ASBJ Statement No. 21, issued on September 13, 2013; the “Business Combinations Accounting Standard”), the Accounting Standard for Consolidated Financial Statements (ASBJ Statement No. 22, issued on September 13, 2013; the “Consolidation Accounting Standard”), the Accounting Standard for Business Divestitures (ASBJ Statement No. 7, issued on September 13, 2013; the “Business Divestitures Accounting Standard”), and other accounting standards have been applied. Accordingly, the method of recording differences associated with changes in the Company's ownership interests in subsidiaries under ongoing control of the Company was changed to record them as capital surplus, and the method of recording acquisition-related costs was changed to recognize them as expenses for the fiscal year in which the costs are incurred. Furthermore, for business combinations carried out on or after January 1, 2016, the accounting method was changed to reflect the reviewed acquisition cost allocation resulting from the finalization of the tentative accounting treatment in the quarterly consolidated financial statements for the quarterly period in which the business combination occurs. In addition, the presentation of net income, etc. has been changed, and the presentation of minority interests has been changed to non-controlling interests. In order to reflect these changes in presentation, reclassification was made to the quarterly consolidated financial statements for the three months of fiscal 2015 and to the consolidated financial statements for fiscal 2015.

Application of the Business Combinations Accounting Standard and other standards is in accordance with the transitional treatment provided in Article 58-2 (4) of the Business Combinations Accounting Standard, Article 44-5 (4) of the Consolidation Accounting Standard, and Article 57-4 (4) of the Business Divestitures Accounting Standard, and these standards will be applied from the beginning of the first quarter of fiscal 2016 and on into the future.

These changes have no effect on the quarterly consolidated financial statements for the first half of fiscal 2016.

(Change in the Depreciation Method for Property, Plant and Equipment)

In accordance with a revision of the Corporation Tax Act, “Practical Solution on a Change in Depreciation Method due to Tax Reform 2016” (PITF No. 32, issued on June 17, 2016) has been applied effective from the second quarter of fiscal 2016. Accordingly, the depreciation method for facilities attached to buildings and structures that were acquired on or after April 1, 2016 has been changed from the declining-balance method to the straight-line method.

This change has minimal effect on the quarterly consolidated financial statements for the first half of fiscal 2016.
